Aviation-InFraConsult

THE COMPANY

independent, experienced, performance-oriented

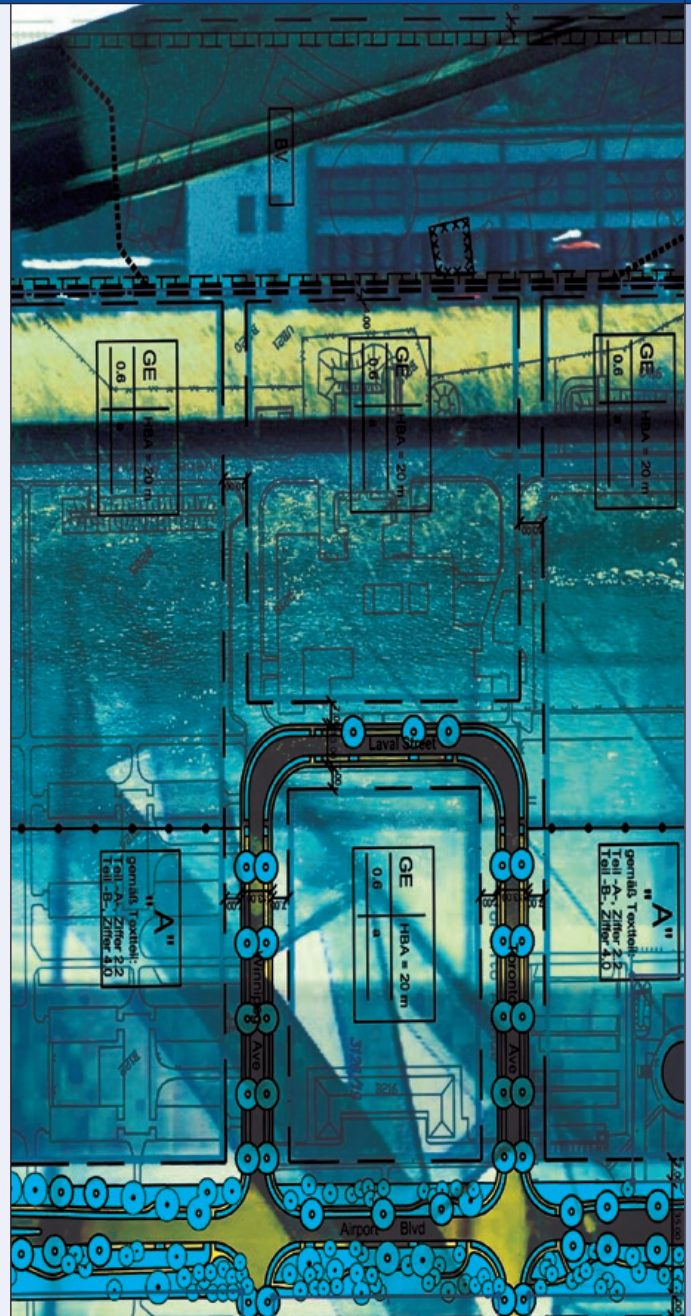

Aviation-InFraConsult is a privately-owned, independent engineering company for project management & development and for airport operations based out of Memmingen / Allgäu (Bavaria) Airport.

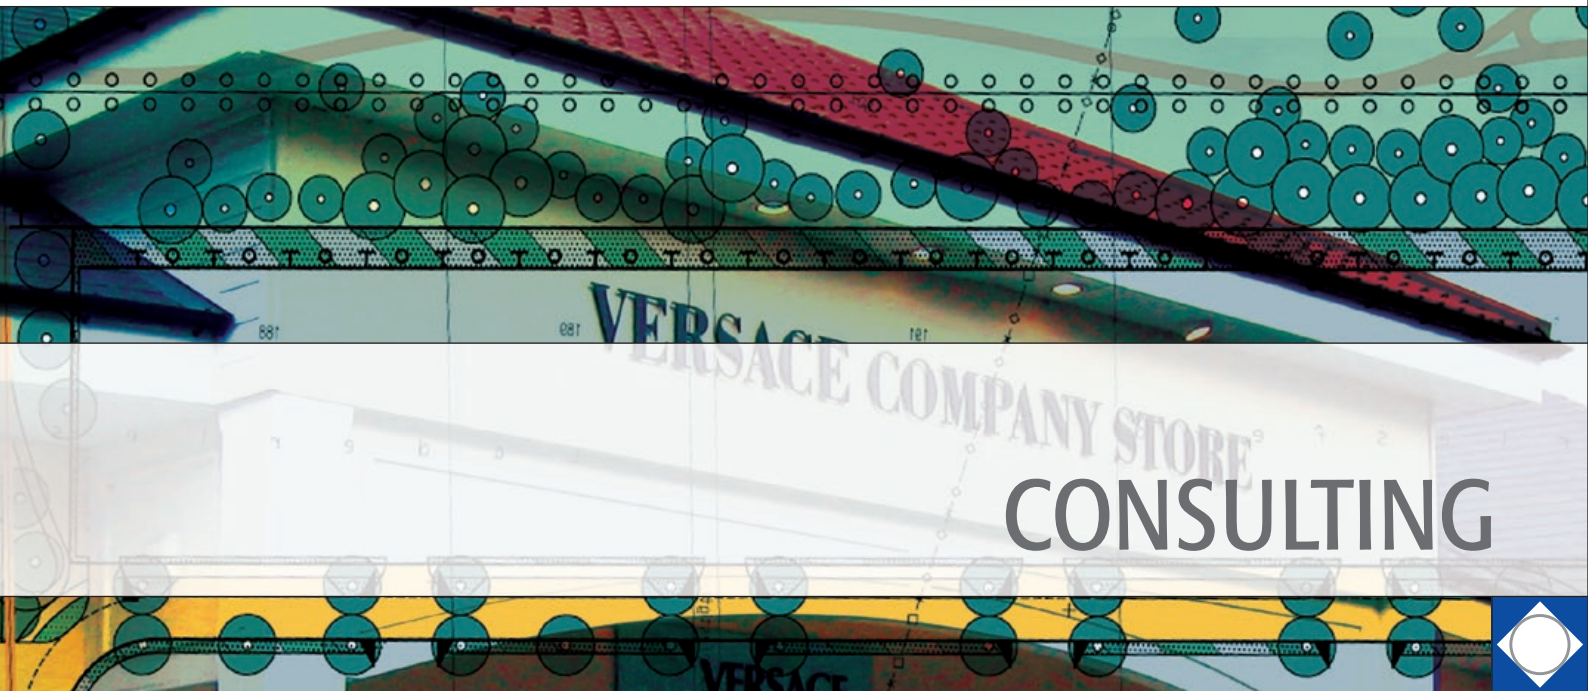

Our main expertise lies in the sectors of Consulting, Development, Setting-up and Operation of:

- Airports
- Industrial and Business Parks
- Infrastructure Facilities

Our services include comprehensive consultation and support to our clients during the individual project phases as well as the acquisition of licenses and authorizations through and including the setting up and operation of the particular projects.

Due to our long-term experience as planners and project developers as well as in technical management of business parks and management of regional airports we possess the necessary know-how. So how can we assist you with your project?

economic and competent

We get involved. As consultants we are available and at your side for any project issues that may arise. Aviation-InFraConsult helps you to find and implement solutions which optimize both the economic and process engineering aspects of your particular project. We support you in procuring airport specific equipment e.g. navigation equipment, apron vehicles and lots, lots more.

Our customers value our expertise, our many years of experience in project development and process engineering management. We are the right partner for your project. Get to know us.

Just ask and we will advise you.

We offer solutions and support.

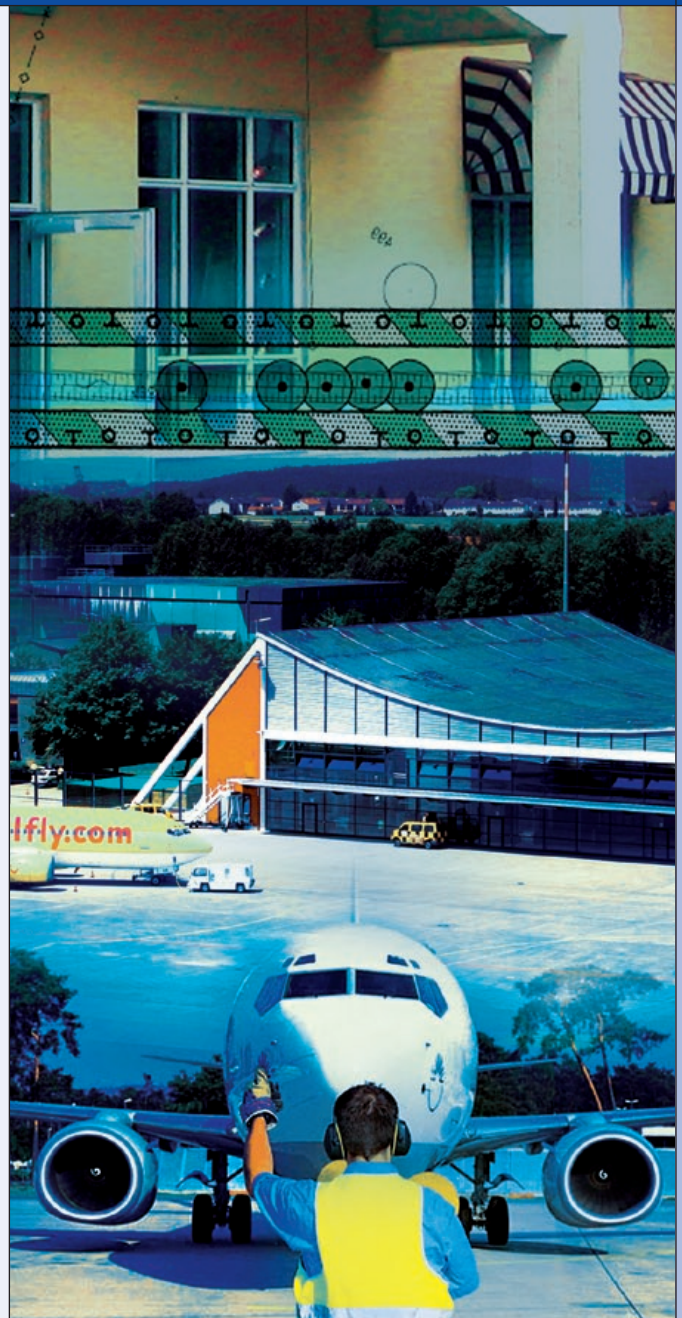

We offer concepts and implement them.

We think and act cost-effectively and are extremely competent.

We calculate your projects.

- Every aspect of Development
- Every aspect of Authorization
- Every aspect of Construction
- Every aspect of Operation

Your project is our task!

PROJECT MANAGEMENT

project-tailored, prompt response

We not only solve all complex issues promptly arising from your project. We are also capable of integrating the most varying aspects of the project. We provide a comprehensive made-to-measure performance package which covers all aspects of project management.

Our tasks include:

- Project organization
- Project support
- Setting up and operation of airports
- Project coordination
- Assistance to planners and surveyors
- Support and optimization of airport operations from a time-keeping perspective

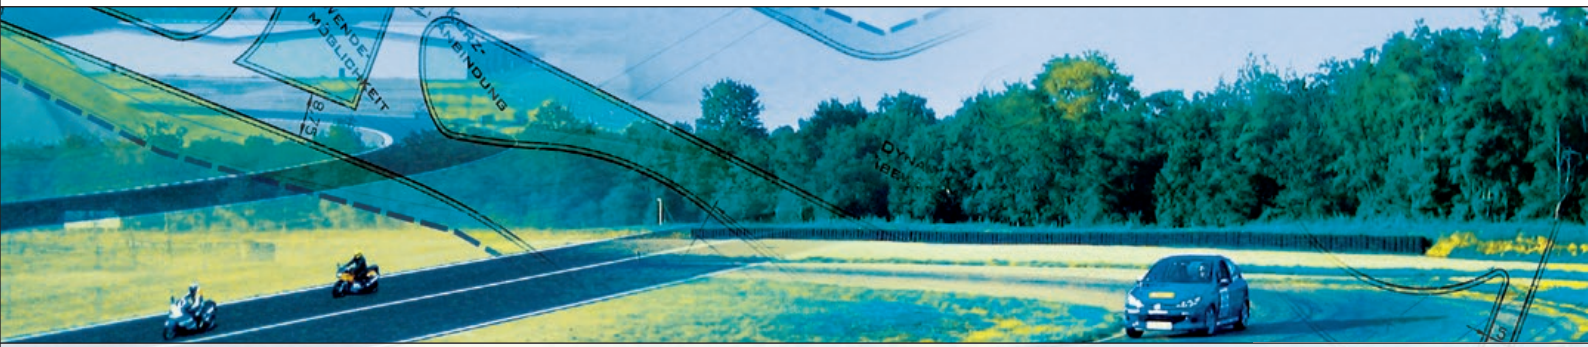

In addition, we are the right business partner for process engineering since, for the most part, licensing procedures for the completion of your project are often time consuming and cost-intensive. Aviation-InFraConsult advises you comprehensively throughout the entire authorization process until all notices of approval have been granted.

We assume the following tasks:

- Supporting you with authorization processes
- Support in aviation law processes
- Coordination with licensing authorities
- Quality Control

Your project is our challenge.

DEVELOPMENT AND OPERATING

select-expertise, supervision, support

We are there for you when it is necessary to coordinate all of the processes in your project, to drive the project proactively and with the right expertise, from choosing the site to the initiation of operations. For us, operating means supporting you effectively and efficiently within the period of the envisioned project.

We offer you:

- An integrated approach
- Economic implementation
- Control and coordination of project participants
- Quality control of planning and execution
- Expert support within the advancement of the project
- Tracking of schedules and costs.

The tasks to be solved in project development involving the combination of location, capital and the project conception are becoming more and more complex. As a result, the demands on the developing company are rapidly increasing. For this reason the solutions provided by innovative and experienced business partners are indispensable – business partners like Aviation-InFraConsult.

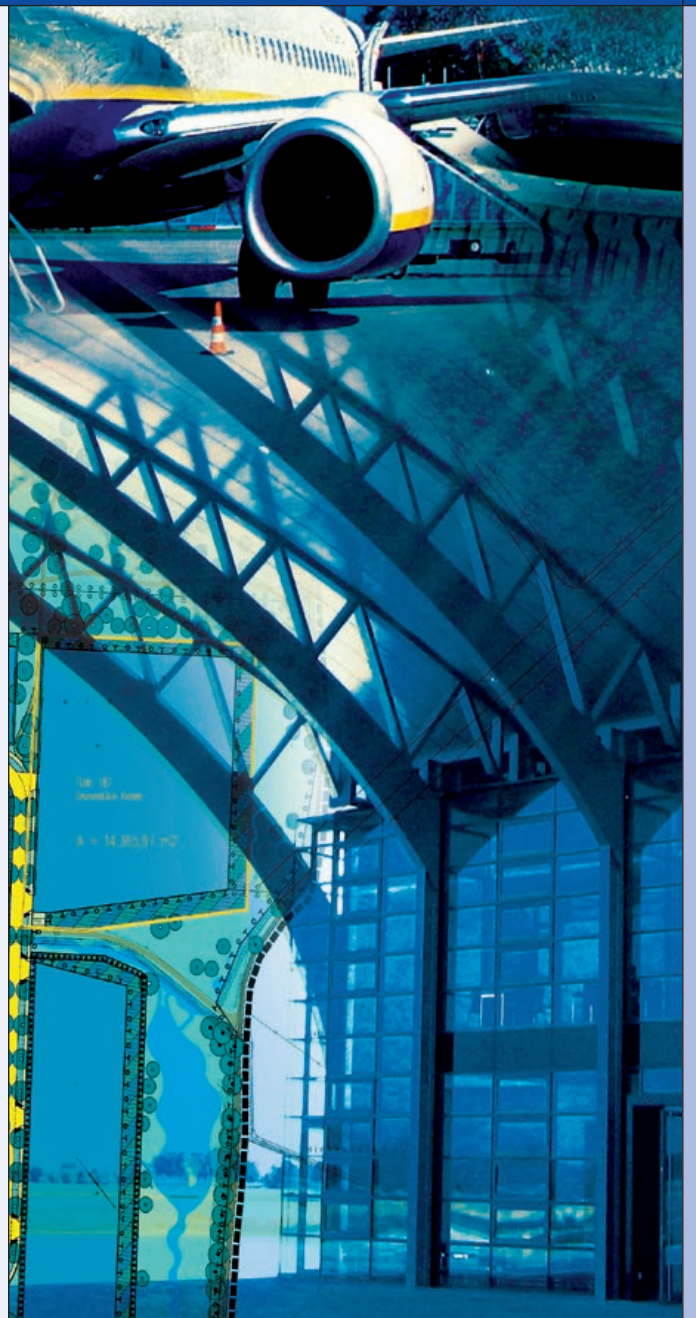

You need support in:

- Airport development
- Airport expansion
- Master plans
- Airport operations
- Development of sites and buildings

We have the necessary know-how in:

- Consultation
- Conceptualization
- Planning
- Operations
- Locating investors and investor support
- Pin-pointing locations and sites

Your project is our task.
